Judge's Comments:

In the show, I see you are very broad in the range of treatments even though it's the same medium. I'm seeing a range from bold, highly graphic pieces to sensitive mark making pieces. I'm seeing a range from representational to abstract and some that blend those two together. The story of design shows up and many of these, especially the award winner. I see that the artists have done a lot of innovative things with the medium. Everything from dense opaque to highly translucent treatments. It was very challenging picking award winners due to high levels of talent and mastery among the artists.
